

MEHMET SESEN

Lead Web Developer

Have delivered several large-scale web projects for multiple multi-million-pound companies in the UK. This included complete ownership of the projects from the initial planning phase through to development and deployment. Have implemented complex third-party integrations into existing platforms for enhancing current functionality and improving business processes. Firm believer in TDD for minimising bugs and issues at production. Keen on keeping the technology stack up to date for staying competitive as an individual, team and business!

Self-motivated and never gives up on the problem. Enjoys overcoming challenges and whether its jumping from Angular to Vue.js, utilising pure PHP with or without an MVC framework, or working with NodeJS, I have a keen eye for the latest software development tools and techniques and able to pick up new programming languages and adopt to current development tools.

Skills

FRONT-END

BACK-END

GENERAL EXPERIENCE

- Web Development**
Can work both on the front-end and back-end. Can anticipate possible problems and plan accordingly. Able to plan & develop projects with possible future growth. Good knowledge of general programming (classes, functions, variables, arrays, loops, data types etc.), including OOP concepts. Comfortable of designing, planning and implementation of Relational Databases.
- Server Side**
Proficient with PHP and Laravel, and have years of experience working with MVC frameworks for developing dynamic web applications. Comfortable working with *nix operating systems.
- Tools**
Using Vagrant virtual machines for rapid and portable development environments that mimic the production environment. Exposure to and developing/publishing at least one application using various development Environments/Tools such as Adobe Flash (ActionScript 3), Corona SDK (Lua), Android Studio (Java), Apache Cordova (Web Technologies) and Sublime Text/Visual Studio Code (Web Development).
- Teamwork**
Have worked in a team as a lead developer managing designers and junior developers, as well as freelancing, meeting with various clients to discuss, plan, advise, and train in all areas related to their online presence needs.
